

EQUILIBRIUM™

EQUILIBRIUM™ VMAT TBI OVERLAY SYSTEM

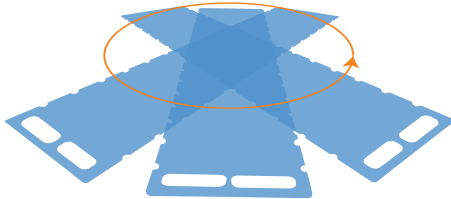

Equilibrium™ is an exciting new technology allowing for controlled 360° degree rotation about the central axis of a patient.

Effortless Rotation for Optimal Treatment Outcomes

Initially developed for VMAT TBI / TMI.

EQUILIBRIUM™ employs technology to keep the therapists and patients safe at all times as they do what was previously never possible, efficiently.

KEY FEATURES:

- > Low density throughout
- > Integrated indexing points
- > Wall mount compatible
- > Self-locking
- > Compatible with any indexing system
- > Available: MR Compatible
- > If required, custom lengths are available.

*Optional: VariLock - +/-5° degree of yaw adjustment

*Note: Contact your sales representative for custom requests
